

Javier Bernal Acosta

Lima, Peru Fishas02@gmail.com +51 922-094-521 DNI: 71395200 Portfolio

Summary

Full Stack Web Developer with over 3 years of experience combining strong software engineering foundations with advanced adoption and integration of Artificial Intelligence (AI-Assisted Engineering). Specialized in the architecture and implementation of modern ecosystems built with Next.js, React, Astro, and Headless WordPress solutions (custom plugin development and high-performance REST API consumption/creation).

Enhancing the design and software engineering lifecycle through the synergy of Figma, Stitch, and generative AI workflows, accelerating prototyping and implementation of UI/UX architectures for intuitive admin panels and CRM systems. Expert in orchestrating and integrating MCP (Model Context Protocol) within IDEs/AI agents, connecting local contexts and third-party tools to automate complex tasks, optimize code maintainability, and maximize deployment velocity across the Software Development Life Cycle (SDLC).

Extensive background in process automation and WebOps (n8n / Docker containerization), critical database migrations, and designing scalable e-commerce architectures (Shopify / WooCommerce).

Experience

WordPress / Full Stack Developer | 2024–Present

Web Development, Migrations & API Architecture

Nazca Brands – "<https://us.orgaanika.com/>"

- **End-to-End Migration & Web Redesign:** Led the complete platform migration from a custom WordPress build to Elementor, significantly improving maintainability, scalability, and design customization capabilities without sacrificing performance.
- **Data Management & Integration:** Securely extracted and restructured user databases, sales records, user comments, and media assets for seamless integration into the new web ecosystem.
- **Advanced Integration & Workflows (Shopify & Custom APIs):** Developed and integrated custom REST APIs to enable an exclusive purchasing workflow and custom dynamic views for special user accounts across the platform.
- **Custom Plugin Development & Security:** Built custom plugins for migrated user comment moderation and implemented a *must-use plugin* (mu-plugins) architecture to host critical API logic, preventing accidental deactivation and hardening security.
- **UI/UX Design & Admin Dashboard (In Development):** Ideated and designed in Figma and Stitch (leveraging AI workflows) an intuitive CRM/admin interface for managing internal company payments and operational history.

Full Stack Developer | 2024–Present

Focus: Fullstack Development & Automation

La Cueva Corporación – "<https://cuevacorporacion.com/>"

- **Modern Development & Headless Architecture:** Built full-fledged websites and landing pages integrating WordPress as a decoupled admin CMS (Headless) connected to a Next.js and React.js frontend, applying Tailwind CSS and Atomic Design methodologies to ensure fast, modular, and scalable interfaces.
- **Process Automation:** Implemented n8n workflows (deployed via Docker) for automated user and metadata management and registration (such as JW Player Media IDs) into databases and Google Sheets.
- **Web Ops & Security:** Responsible for malware detection and cleanup in WordPress environments, as well as managing private servers, cPanel, and advanced DNS configurations.
- **Optimization & Performance:** Developed custom plugins to optimize specific functionalities and continuously improved the technical SEO positioning of corporate websites.
- **E-commerce Management:** Advanced administration of WooCommerce, including integrating custom fields using ACF for extra sections inside the admin panel (also adding it to proprietary plugins) and providing specialized technical support for checkout processes.
- **Live Streaming:** Managed and created pages configured for live streaming utilizing the JW Player app (for the live feeds) and Slido (for the live comments section).

Shopify Developer & Troubleshooting Specialist | 2024–2025

Project & E-commerce Operations

Esmeyodrilia – "<https://esmeyodrilia.com/>"

- **Checkout Optimization:** Resolved critical intermittency issues within the checkout pipeline, ensuring transaction stability.
- **Shopify Customization:** Implemented custom fields (ID/DNI and District) at checkout to adapt the platform to local legal and logistical requirements.
- **UI/UX Debugging:** Corrected rendering issues and touch responsiveness on the mobile homepage main banner, boosting click-through rates.
- **Logistics Business Logic:** Programmed dynamic shipping cost assignment systems based on district segmentation.
- **Transaction Control:** Implemented product cancellation logic directly inside the checkout interface.

Fullstack Web Developer | 2024

Freelance / Fiverr

Zoom WebDevelopers

- Multi-client Support: Executed technical improvements and proactive maintenance for the main platform and various international client sites.
- E-commerce & Blogs: Developed custom solutions for online stores and blogs using WordPress as a CMS alongside advanced page builders.
- Web Performance Optimization (WPO): Drastically improved response times through strategic setup of WP Rocket and Autoptimize.
- Organic Positioning: Implemented technical SEO strategies based on deep audits with SemRush and Meta Explored.
- Mobile-First Philosophy: Designed and deployed responsive interfaces, consistently prioritizing mobile device experience.

Fullstack Web Developer | 2024

Project: Astro & Headless CMS

Stylesphere

- Full-Cycle Development: Handled end-to-end project management from hosting acquisition and infrastructure configuration (Hosting/DNS) in Hostinger to the final deployment.
- Hybrid Architecture: Implemented a high-performance frontend with Astro using WordPress as a Headless CMS, optimizing load speed and content management.
- E-commerce Engineering: Developed advanced functionalities via plugins for rating systems, dynamic variant selection (sizes/colors), and customer review management.
- Data Management: Configured integrated databases in WordPress for user registration and automated direct marketing campaigns.
- Technical SEO: Structured additional pages and optimized metadata to maximize organic search engine rankings.

Front-End Developer | 2023

Project: Interface Development & Layout

Agencia Consigue Ventas Online

- Interface Development: Developed high-performance websites using JavaScript and scalable CSS architectures (Sass/BEM), ensuring a seamless user experience.
- Direct Collaboration: Conducted layout design and deployment of web projects, aligning design goals with technical optimization to exceed competitor standards.
- Optimization: Strategically integrated SEO and loading speed enhancements through deep SemRush audits and advanced WordPress plugin configuration.

Education

Advanced Front-End Developer with Javascript Focus - IDAT

Duration: 01-03-2024 to July 17, 2024 | Status: Course / Completed

In-Depth Front-End with React.JS - Platzi

Duration: 01-10-2022 to 28-10-2023 | Status: Course / Completed

Skills

- **AI Engineering & Tools:** AI-Assisted Engineering, MCP (Model Context Protocol), Stitch, Generative AI Workflows
- **Frontend & Modern Stack:** React.JS, Next.JS, Astro, Tailwind CSS, Atomic Design, Sass (BEM & Smacss)
- **CMS, E-Commerce & Backend:** WordPress (Custom Plugins/APIs, Headless CMS, Elementor, `mu-plugins`), PHP, Shopify Plus, WooCommerce
- **UI/UX Design & Prototyping:** Figma, Stitch, AI-Assisted Prototyping
- **Automation & Ops:** n8n (Workflows), Docker (Deployment), Cloudflare (WAF/DNS), MySQL DB Migration
- **Tools & SEO:** SQL (Databases), Technical SEO (SemRush / Meta Explored), Google Sheets API
